Cameron Leaving IDC-USA

Indianapolis, Ind. — After a short stint as Director of Information Systems, Robert Cameron has announced he has accepted a position with Service Supply and will be leaving IDC-USA on October 5th. Cameron joined IDC-USA in March of this year and his departure was a surprise to IDC-USA management. He has a reputation for being a very talented IT manager with strong skills in Activant Prophet 21 distribution software.

“Knowing the offer Bob received from Service Supply, I can hardly blame him for taking the job. He has a pretty high profile among the Prophet 21 ERP users,” said Jack Bailey, President and CEO of IDC-USA.

Cameron informed Bailey in a private meeting that he had been approached by Service Supply with an opportunity of employment. Cameron stated, “I have really been excited about what we’re doing at IDC and the growth that is taking place. I just feel that this is an opportunity that I can’t pass up.”

IDC-USA is known for its comprehensive eCommerce website that allows distributor member-owners access to real time inventory, manufacturer’s inventory, usage history, and on-line ordering. Bailey reported that a replacement for Cameron had not been named and a search was currently being conducted. “The positive is that we were able to get an incredible amount of things accomplished during Bob’s short tenure,” said Bailey. “My current priority is to find a person that has the qualifications to keep that momentum going.”

Established in 1988, IDC–USA is a member-owned purchasing and national marketing cooperative of independent distributors of industrial bearing, power transmission and industry related products. The cooperative currently consists of over 200 distribution locations in 41 states and over \$1 billion in annual sales. IDC-USA’s Distribution Center, IDC University, and Corporate Offices are headquartered in Indianapolis, Indiana.
